# An accident in the jungle

Bruce Scott and his wife Lesley are from London. They were in their 60s when Bruce finished his work as a photographer. They decided to travel the world. They sold their flat in London and bought a large car. They set out on their journey and spent four years driving around South America. Bruce told us what happened when they were driving across Brazil.

Bruce told us about the accident: 'We were going along a small road through the jungle on our way to Manaus, a city about 300 kilometres away. We were driving over a small bridge when it suddenly collapsed. The car fell into the ravine below. I don't know how we weren't badly injured.'

After the accident Bruce and Lesley climbed out of the ravine. They did not know who to phone in Brazil so Lesley called her sister 8000 kilometres away in England. Lesley told her about their accident. Lesley's family rang the British police and they rang the police in Brazil. The Brazilian police sent a helicopter to look for Bruce and Lesley. ## Saudi Stars: Communication

People communicate in different ways, for example by speaking, by writing, by using their hands and by showing expressions on their face. We can learn information by studying how we communicate. For example, we can learn a person's age from their grammar - a young child often makes more grammar mistakes than an older person. We can tell how a person is feeling by looking at their face - for example, if a person is smiling, he or she is usually happy - or by listening to people's tone of voice - the emotion in their voices when they speak. If a person speaks angrily, that person is probably angry. We can often say where someone comes from when we hear how he or she pronounces words. People from different places sometimes say the same word differently. Finally, we can often tell who a person is speaking to from the choice of words. We might say informal words like hi or bye to our friends but formal phrases like good evening, sir or excuse me, madam when we meet a stranger.

- The Council of Ministers are important people in Saudi Arabia. They make predictions about the future, and then make plans to make our lives better. Here are some of their predictions and plans for life in Saudi Arabia in 2030.
- In Saudi Arabia today, more than half of the population is under 25 years old. If they all get an excellent education, they will be able to help their country. In the last few years, the number of women studying at university has increased, and it will probably continue to increase. The plans in Vision 2030 will help them. However, the Council of Ministers won't forget to help other groups, such as disabled people, too.
- In the last 30 years, many people have died in car accidents. This number of deaths might increase in the future because more people are travelling by car. On the other hand, the Council of Ministers have a plan to improve traffic safety and reduce traffic accidents, so this probably won't happen.
- In 1960, the average life expectancy of people in Saudi Arabia was 45 years of age. It is now 75 years. The Council of Ministers think life expectancy will continue to increase if people don't smoke and are careful about their weight and diet. In 2030, they predict it will be 80 years.
- The number of people in the world is growing. If the world's population continues to grow, it may increase to about 9 billion in 2025. In Saudi Arabia, the population has risen from 5 million in 1960 to about 30 million today. In 2030, it will be even higher. The plans in Vision 2030 will make sure all the people living in Saudi Arabia have a good quality of life.
- In the last 50 years, the cost and size of computers has decreased. They have also become faster because the speed of computer chips has doubled every two years. Vision 2030 expects this to continue, so the country will invest in, and lead, the digital economy

# A READING Are the sentences about the text true (T) or false (F)?

Sami's father sometimes goes to England on business. This year Sami went with him and they stayed in a hotel in London for a weekend. It is much colder there than in Riyadh, so Sami's father took him to a department store to buy a warm coat. He noticed that everything in the store cost more than in Saudi Arabia. On the first day they took a bus tour and saw many famous buildings and monuments. Sami thought that the most interesting of these was Buckingham Palace, the home of Queen Elizabeth II. The next day they went on a boat trip on the River Thames and rode on the London Eye. They had wonderful views of the city from the top. Sami could see that London is bigger than Riyadh.

- 1 An interesting visit to make is one to the small town of Al-Ula. More than 2000 years ago, it was the capital of the ancient Lihyanite people. The town was on an important route for the trade of spice with Egypt and North Africa.
- Al-Ula is about 400 km from the holy city of Medina and 110 km from Tayma in northwest Saudi Arabia. Its history goes back 2500 years. It lies in a valley and in winter visitors can see the high mountains in the distance. There are date trees and hills at each side.
- The later town of Al-Ula developed in the 13th century. It has excellent examples of old Arab buildings. A walk in the small streets takes you back in time and you can almost feel the life of the people who once lived here. Visitors can go into most houses and see what a house built 700 years ago was like.
- For the adventurous and fit, there is a castle near the town. A climb to the top is hard work but the view is great. The history of the castle goes back to the 6th century. The castle has stones in it from the nearby hills and from an older castle.
- Al-Ula Museum is a small museum with ancient items on show as well as information on the culture, plants and animals of the area. It is a good place for an educational visit and is open from 8am to 2.30pm from Sunday to Thursday.

- Nisitors to cities often do not know where places are and ask questions like, 'Excuse me, where is the nearest bank?' or 'Please could you tell me where the hospital is?'
- There are two general ways to give directions.

- Give clear and easy to follow directions. For example, say, 'Turn left on this street at the school. Then go straight on for a kilometre until the park.'
- A street name, a building or a shop help visitors to know which turning to take. You can add the compass direction as well: 'Turn left at the traffic lights into Foster Road then go east.'
- can say how many streets to pass and also how long the journey will take, for example, 'Walk for two minutes and pass two roads on your right before you turn left.'

F

A

- When you have finished telling a visitor how to get to a place, ask him or her to repeat what you have said so you know that the visitor has understood the route.
- Ask the person to face where he or she wants to go, then use your hand to point to the directions. You can also draw a simple map if you have a paper and pencil. Both these things help people to understand directions.

READING Complete paragraphs A-E with the correct phrases from the box.

> who came here who travelled to who became where Yemenis lived who live in where they found who was where Muslims can study where I live who have been

## Islam in Britain today

 In my research I discovered there are about one and a half million Muslims who live in Britain today. The story of Islam in Britain begins about 500 years ago. There is a record of a British man, John Nelson, who became a Muslim at that time.

A factory in the north of England

- During the 18th century, other British people who travelled to the Islamic world converted to Islam, for example Edward Montagu, 4 who was the son of a British ambassador to Turkey.
- The first large group of Muslims in Britain were sailors from India who came here about 300 years ago. The next group were Yemeni sailors. The first mosque in Britain was in Cardiff, a port city 6 where Yemenis lived
- 1 Many Muslims arrived in Britain in the 1960s. They came from India or Pakistan. They came to towns in the north of England like Leeds and Bradford where they foundjobs in factories. There are now many Muslims who have been in Britain for 50 or 60 years and many more who were born here.
- [] In Blackburn, the town 9where | live , 20 per cent of the population is Muslim. There are two Islamic secondary schools, one for boys and one for girls, 10 where Muslim students can study.
